In what is looming as another public relations predicament for Goldman Sachs, the banking giant admitted today that it made "a substantial financial bet against the Gulf of Mexico" one day before the sinking of an oil rig in that body of water.

Andrew D. Basiago

Richard, It's about money! We have to: Appoint a special prosecutor to investigate whether this act of terrorism, like 9/11, resulted from a conspiracy to commit a reinsurance scam. Have FBI agents arrest the management of Goldman Sachs and deport all BP personnel in the United States. Nationalize the assets of Goldman Sachs and BP in the United States and every other country in our sphere of influence. Use the combined assets of Goldman Sachs and BP to clean up the oil spill in the Gulf of Mexico and with what is left create a Global Marshall Plan that would have as its focus the establishment of a new energy regime. Elect President Jesse Ventura and Vice President Andrew D. Basiago in 2012. Gee, you think the City of London might be listening to this Cambridge man's project for a new American century? Andy
