Hi, Andy!

We are doing a gig here in Melbourne, Australia called the Galactic Cabaret. We do a dedication every show. This month, we are dedicating our show to you and your work. Do you have any particular message that you would like us to share with our audience at the Galactic Cabaret?

In deep admiration,

Jonathan

Jonathan,

I'm honored!

Yes, the message that I wish to share with your audience at the Galactic Cabaret is that when I speak of the Time-Space Age, I do not merely mean a world linked by teleportation, but one in which humanity will at last take its place among the time- and space-faring civilizations, by elevating all seven billion inhabitants of our planet to the status of fully functioning participants in human evolution, with adequate food, shelter, health care, and education guaranteed as basic human rights, so that as we begin to venture out into the Cosmos, in a spirit of cosmic oneness, we can show, in a spirit of cosmic citizenship, that we are worthy of being a time- and space-faring civilization.

Sincerely,

Andy
