

ANDY REVEALS CHILDHOOD CONTACT WITH THE GRAYS

Andrew D. Basiago, the Team Leader of Project Pegasus, is often asked whether he is an extraterrestrial “contactee.” In this response (below) to a question posed by Catherine Merrill on Facebook about extraterrestrial contact in childhood, Andy acknowledges that he is a “contactee” and states that his contacts with the Grays resulted from, rather than caused, his time travel experiences

Catherine,

I had contact with the Grays in childhood that seems to have been prompted by my involvement in US time travel research and development activities as a child participant in DARPA’s Project Pegasus.

I think their interest in me was prompted by the fact that the US government had placed me in the domain in which the so-called "extra-terrestrials" – I would say, "inter-dimensionals" – regularly operate, namely, that supra-luminal realm in which they travel between dimensions in the time-space continuum.

As I began my investigation into my experiences in Project Pegasus, one of the major theories I was exploring was whether my experiences resulted from “downloads” received during contact with the Grays. However, that was completely rebutted by the information that I gathered as I pursued my investigation.

In addition to having my involvement in Project Pegasus confirmed by the White House in a secret meeting held at Wolf Creek Pass Ski Lodge in Southwest Colorado in June 2003, it also became clear as I searched my memories that the Grays sometimes showed up during our quantum access activities.

For example, one time when I was moving forward “astrally” in the Montauk chair, everything stopped, and I could see that four Grays were standing over on my right in the time tunnel produced by the chair, observing what was going on.

So, my conclusion was that they were monitoring my experiences but not producing my experiences.

We do a disservice to the truth in the way that we conceive of the so-called ETs as "extra-terrestrials" in “space ships.” That was the negative legacy of, among other things, the MJ-12 literature. They are, in fact, "inter-dimensionals" in “time ships.”

Andy
