

ANDY TELLS SCHOLAR ZECHARIAH SITCHIN THAT US DEPARTMENT OF DEFENSE ESPOUSED ET INTERVENTION IN ANCIENT SUMER AS ORIGIN OF CONTEMPORARY CIVILIZATION IN 1970'S

Andrew D. Basiago

Zechariah Sitchin

*The experiences of **Andrew D. Basiago** in DARPA's Project Pegasus as one of America's early time-space explorers encompassed many themes and, therefore, connect to the work of many leading figures in contemporary parascience and parapolitical studies. Not the least of them is **Zechariah Sitchin**, the renowned scholar of Mesopotamian history, who in **The 12th Planet** and its sequels holds that the civilization that we inhabit resulted from extraterrestrial-human collaboration 5,000 years ago in Ancient Sumer. In this e-mail, written by Andy upon accepting the illustrious Dr. Sitchin's "friend request" on Facebook, Andy tells Dr. Sitchin that his concept about the origins of human civilization was not only known to the US intelligence community in the early 1970's but was espoused as a secret official intelligence finding that was being taught to the gifted and talented American schoolchildren receiving "secret schooling" to prepare them for service as America's first generation of "chrononauts."*

Dear Dr. Sitchin, When I was a child serving on DARPA's Project Pegasus, which was the US government's time-space exploration program at the time of its emergence in the early 1970's, the children in the program attended a number of "Yellow Book" lectures about different esoteric subjects, including such topics as the origins of human civilization on Earth, the ASTART alphabet for alien-human communication, and the history of extraterrestrial visitations to Earth and interaction with the human race. During these lectures, which were sponsored by the US Department of Defense, we were told that the contemporary civilization on Earth arose in Ancient Sumer around 3,000 BC, with intervention by the extraterrestrial species identified in the UFO literature as "the Grays." This intervention, it was explained, was an attempt to re-establish an advanced civilization on Earth after the first human civilization on Earth, the Ancient Egyptian civilization that built the Great Pyramid and the Sphinx, was destroyed in a solar system catastrophe around the year 9,500 BC. In light of the estimable scholarship that you have produced in regard to the Sumerian epoch, and the extraterrestrial-human interaction that took place in Ancient Sumer that had such a profound influence on the destiny of the human race and the emergence of civilization as we know it, I am writing to you to apprise you of the fact that this was the official position on the meta-history of contemporary human civilization on Earth that was held by the US intelligence community in the 1970s, for it was the position that they were teaching the gifted and talented school children, including myself, that they were training to become America's first generation of "chrononauts" following the emergence of teleportation and chronovision by 1970. It is my high honor and distinct privilege to have you as a friend on Facebook. Your friend in time-space, Andy
